

Safer, Greener, Faster and Cheaper

Manufacturing improvement is now a key area for companies, as they seek to reduce costs and increase their flexibility to respond to changing market needs.

NiTech's **DN15** range is designed for today's manufacturing challenges.

The **DN15** continuous crystallisers and reactors are portable, modular and easily scalable.

They enable companies to reduce cost and improve product quality and safety.

They also improve process sustainability by reducing energy usage and waste.

The **DN15** continuous crystallisers and reactors can handle a wide range of chemistries, and can be used across industry sectors.

Several major companies have already chosen **DN15** laboratory-scale equipment to help them remain competitive in today's fast-changing markets.

Choose from a range of models to suit your needs:

DN15 Lite 1.25 litres from £45,000

DN15 Standard 2.5 litres from £70,000

DN15 Plus 3.5 litres from £90,000

DN15 HP 3.5 litres price on application
(high pressure and flame-proof)

Our partners can help you discover the benefits of the **DN15** continuous crystallisers and reactors

Trial the **DN15** reactors and crystallisers at one of our European partner laboratories –

- ❖ [SP Process Development](#) in Stockholm, Sweden
- ❖ [MEPI](#) (La Maison Européenne Des Procédés Innovants) in Toulouse, France.

They can undertake feasibility studies on your chemistries, and provide proof-of-concept for a fixed fee.

Ready to help – the SP team in Sweden

You will rapidly obtain the key information you need on a cost-effective basis.

SP and MEPI can also undertake more detailed investigation work as required.

..... and the MEPI team in France

DN15 MAJOR FEATURES

- Laminar Plug Flow ✓
- Uniform solids size ✓
- Linear scale-up ✓
- Fast reaction times ✓
- Consistent product quality ✓
- Flexible/adaptable configuration ✓

Our partners have the know-how to ensure a successful project.

They are an ideal way for you to confirm the ability of NiTech's **DN15** technology to deliver major benefits for your own specific processes.

NiTech's DN15 continuous crystallisers and reactors are the *Safer, Greener, Faster and Cheaper* solution for today's manufacturing challenges
